EasyJet about the attack

easyJet

- "This was a highly sophisticated attacker. It took time to understand the scope of the attack and to identify who had been impacted" to the BBC. They also said "We could only inform people once the investigation had progressed enough that we were able to identify whether any individuals have been affected, then who had been impacted and what information had been accessed".

Card security code - CVV

How the breach happened?

- Similar to British airways breach
- Vulnerability in third-party Javascript

What should have been done to prevent the breach?

- Having right security management infrastructure
- Not using third party JS plugins

What are the consequences?

- **9 000 000** people affected
- **2 208** credit card details accessed
- Stolen credit card details includes **Card security code**
- **Phishing** attacks
- The real consequences are **yet to be seen**. They are surely lot worse than EasyJet is claiming.

The EasyJet logo is displayed in white text on a background of overlapping orange and red geometric shapes. The text "easyJet" is in a bold, sans-serif font, with "easy" in lowercase and "Jet" in uppercase.
